

# Oils

Our oils have a minimal negative impact on people, machinery and the environment. The majority are completely or partially biologically degradable.

## Aspen 2-stroke oil

Aspen 2-stroke oil is fully synthetic. The oil is suitable for all types of air-cooled 2-stroke engines for both mixing with petrol and for engines with separate lubrication. Fulfils the requirements according to ISO-L-EGD and JASO FD. Sold in 1, 4, 20 and 200 litre containers.

## Aspen bio engine Oil

Aspen Bio engine oil is a biologically degradable, fully synthetic engine oil based on renewable raw materials. The oil is suitable for all types of petrol- and diesel engines. Its viscosity is 5W/30, which provides excellent starting properties and great stability at both high and low engine temperatures. Fulfils the requirements according to API SL/CF. Sold in 1, 4, 20 and 200 litre containers.

## Aspen outboard oil

Aspen Outboard Oil is biologically degradable, fully synthetic 2-stroke oil for 2-stroke outboard engines. The oil fulfils the requirements according to TC-W3® and is based on renewable raw materials. Sold in 1 litre bottles.
